970nm

What Does It Feel Like?

The laser beam is waved a few cm above the skin for a few minutes. No sensation to a mild warm sensation can be felt.

When Do You See Results?

Usually improvement (pain reduction or mobility) is felt after the first few treatments. As the effects are cumulative, results are greater and last longer after several laser sessions.

How Many Sessions?

Protocols are adaptable to your condition.
Recent trauma: Twice a week for 1 or 2 weeks
Chronic injuries: Twice a week for 3 weeks then monthly or on demand.
